

ACKNOWLEDGEMENTS

A project of this magnitude does not happen without the support of a large number of people. The project, to compile a database of the local plants of the Shire of Yarra Ranges, was instigated by Grant Jack, Manager Asset Maintenance and Services at the Shire of Yarra Ranges. Marilyn Gray was given the task of carrying this out.

The Shire of Yarra Ranges is grateful to the many people who have given their time in answering queries or providing information and to the photographers who have granted permission to use their photos to enable us to enhance so many of the descriptions.

The Shire is very appreciative of the assistance received from Dr. Graeme Lorimer of Biosphere Pty Ltd and Neville Walsh from the National Herbarium of Victoria for their willingness to share their expertise and knowledge of the indigenous plants of the area. Other botanists who provided special expertise were David Cameron, Jeff Jeanes, Lynlee Tozer, Hellmut Toelken and Kevin Rule.

Many people assisted by providing information, suggestions and plant lists. This includes Rik Brown whose plant lists for each plant community, compiled for the Shire in 2002, provided the basis for this project. Many staff members of the Shire provided ideas and acted as sounding boards while others collected plant material for photographing. This includes, but not exclusively, Grant Jack, Marty White, Simone Orscheg, Kelly Castelletti, David Blair, the Bushlands team – Gaye Gadsden, Melissa Carmody and Emily Noble, the Arborists team – Paul Mechelen, Chis Howells, Mark Delaney and Nick Withers, and Karwarra Australian Plant Garden staff Regan Bradbury. Kirsty Thomas from the Shire provided the know-how to turn the book into this web-based document.

Members of Friends groups in the Shire provided plant lists to help get a picture of the flora of the Shire and its distribution: Robert Anderson, Joanne Antrobus & Ian Roche of Upper Yarra Valley Park, Robyn Dobson, Geoff Durham, Karen Garth, Jenny Francis, John Hick, Mick Kealy Parks Vic, Margaret Kofod, Dylan Osler, Paul Slinger, Janette Scritchley, Janet Taylor. Other plant lists were obtained from Friends' web pages through the web especially using www.vicnet.au. I am also grateful to the following people who provided specimens of *Kunzea* to assist in separating the three new species: Maureen Bond, Noel Roberts, Kevin Johnson, Terry Smith.

Assistance from the nurseries was important to ascertain which local Shire plants are available to purchase. We received catalogues from Bushland Flora, Friends of the Helmeted Honeyeater Indigenous Plant Nursery, Healesville Plants, Southern Dandenongs Community Nursery, Kuranga Native Nursery, Candlebark Community Nursery, Grace Community Nursery, Knox Environment Society Community Nursery web site, B&T Ferns & Orchids and Australian Ecosystems.

Taking photos of all the species of plants in the Shire of Yarra Ranges was a major challenge and it may never be completed in full. Marilyn Gray was ably assisted in this by Peter Kinchington whose skills in both photographing, especially at macro level, and in using Photoshop to produce all the montages for the Local Plant Directory, were invaluable. We were grateful to individuals and nurseries who allowed us constant access for photographing and often spent considerable time with us to find plants. Thanks to Barbara Setchell, Daniel Flaim and staff at Candlebark Community Nursery, Paul Slinger at Healesville Sanctuary, Lesley Wilson at Southern Dandenongs Community Nursery, Kuranga Native Nursery, Robert Anderson & Michelle Farran at Friends of the Helmeted Honeyeater Indigenous Plant Nursery and Stephen & Chris Fletcher.

The Shire was fortunate to have many photographers give permission for their photos to be used as part of this project. All photos are copyright and the Environment Department of the Shire must be contacted for permission to use any photos in the Directory. We have used photos from the Shire Photographic Library as well as those by several past and current staff members: Marilyn Bull (Gray), Emma Campbell, Owen Gooding, Kelly Hofert, Barry Sheffield, Marty White. We are grateful to Healesville Sanctuary who gave us access to its photo library.

Other photographers are: David Allan, David Blair, Andrew Burgess, Dr. John Braggins (University of Auckland), Gordon Carter (dec) through June Carter, Robyn Dobson, Ilma Dunn (dec), Jean Edwards, Rodger Elliot, Olivier Ezavin, Roger Farrow, Ken Harris, Jeff Jeanes, Greg Jordon (University of Tasmania), Peter Kinchington, John Knight, Colleen Miller www.victorianflora.com, Helen Moss, David Nicholls, Swee Oon, Cathy Powers www.banjarah.com, Colin & Mischa Rowan www.retiredaussies.com, Brian Walters, Dr Jim Willis (dec) and www.southsister.org. Dr. Michael Bayly and Alison Kellow allowed us to use photos from the Grimwade Collection, Botany School, Melbourne University www.botany.unimelb.edu.au/buffalo.

We are very fortunate to have been given permission to use photos from the Australian National Botanic Gardens photo library for this project. All photos are copyright and photographers need to be contacted for use of

their photos. The Gardens website is www.anbg.gov.au . We have used photos taken by: M. D. Crisp, S. Donaldson, Murray Fagg, D. Grieg, R. Hill, D. Kelly, A. Lyne, P. Ormay, M. Parkes, C. Totterdell, John Wrigley.

The copyright of the photos by Helen Moss is held by Helen and they were taken from the CD-ROM "Plants of Melbourne's Outer East - Indigenous and Environmental Weeds (and how to remove the weeds)".

Many of the images by Ken Harris are used by permission of the PlantFiles at davesgarden.com. Peter Kinchington, of www.peterk.2ya.com also created the image for the Vegetation Communities.
